

Languages of the World

Case marking

Gerhard Jäger

12/7/2010

Semantic roles

- Verb describe event types
- Arguments and adjuncts denote participants of the event described by the verb
- **Semantic role**
 - type of relationship between event and participant
 - invariant across verbs and languages

Semantic roles

- Agent

*The **cook** has diced the carrots.*

- Benefactive

*The chapter has been written for **Lindsay***

- Comitative

*I always go to the store with **my dog**.*

- Experiencer

***Freud** feared his mother.*

- Goal

*Ann arrived at **the store** to buy shoes.*

- Instrumental

*Blake is walking with **a cane**.*

- Locative

*Elvis lived at **Graceland**.*

- Patient

*George chopped down **the cherry tree**.*

- Purposive

*The pauper washed dishes **for his supper**.*

- Recipient

*Ivana will donate her diamonds to **the Church**.*

- Source

*Whitney entered from **the rear of the stage**.*

- Temporal

*Father John left the church **at noon**.*

- Theme

*The Unabomber threatened to send **a package** to LAX.*

Grammatical relations

- functional roles in clauses, such as *subject* or *object*
- characterized by a cluster of morphological and syntactic features
- each subsumes several semantic roles
- much cross-linguistic variation regarding marking and semantic content

Grammatical relations

- universally, languages have three grammatical roles that are realized as arguments
- English:
 - subject
The man gave Bill a ticket.
 - direct object
*The man gave Bill **a ticket**.*
 - indirect object
*The man gave **Bill** a ticket.*

Grammatical relations

- inventory differs between languages

German

Der Junge ist dreckig.
the boy.NOM is dirty
'The boy is dirty.'

Der Junge wirft einen Stein.
DEF boy.NOM throw a.ACC stone
'The boy is throwing a stone.'

Kalkatungu (Australia)

Kaun muu-yan-ati
dress.ABS dirt-PROP-INCH
'The dress is dirty.'

Kuntu wampa-ngku kaun muu-yan-puni-mi.
not girl-ERG dress.ABS dirty-PROP-CAUS-FUT
'The girl will not dirty the dress.'

Marking of grammatical relations

- Three ways to code grammatical relations:

- **word order**

The stone hits the bucket.
subject object

- **case**

Der Stein trifft den Eimer.
NOM->subject ACC->object

- **agreement: Kinyarwanda**

umugabo y-ataaye umwana mu maazi
C1.man C1-threw child in water
'The man has thrown the child into the water.'

Case and agreement hierarchies

- number of cases as well as number of cross-referenced arguments varies wildly between languages
- **WALS on number of cases**
- **WALS on agreement systems**
- case hierarchy:
subject > direct object > indirect object > other
- agreement hierarchy
other > indirect object > direct object > subject

Universal syntactic-semantic primitives

- three universal core roles
- more general than semantic roles but more specific than grammatical relations
- cross-linguistically invariant

S - intransitive subject

A - transitive subject

O - transitive object

S, A and O

German

S
A
O

Der Junge ist dreckig.
the boy.NOM is dirty
'The boy is dirty.'

Der Junge wirft einen Stein.
DEF boy.NOM throw a.ACC stone
'The boy is throwing a stone.'

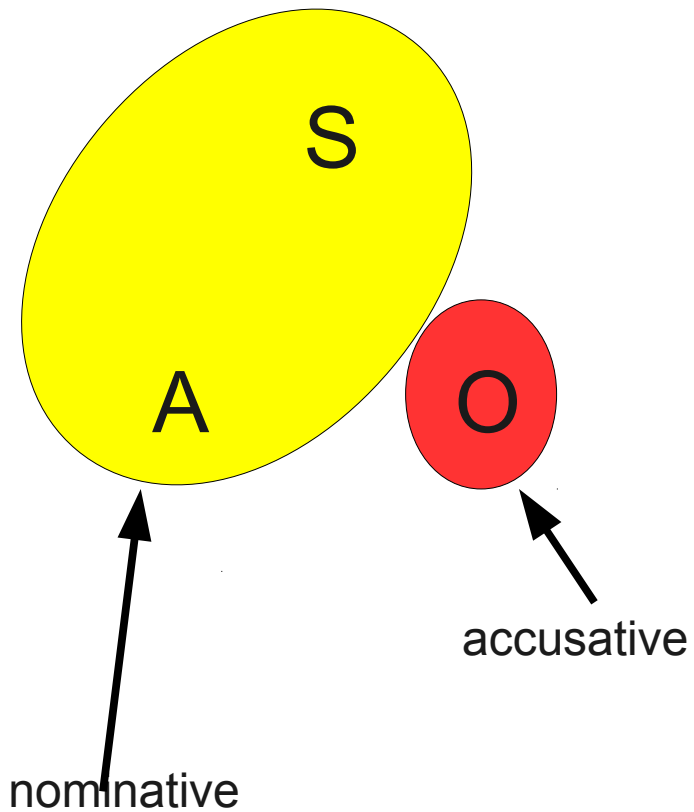

Kalkatungu (Australia)

Kaun muu-yan-ati
dress.ABS dirt-PROP-INCH
'The dress is dirty.'

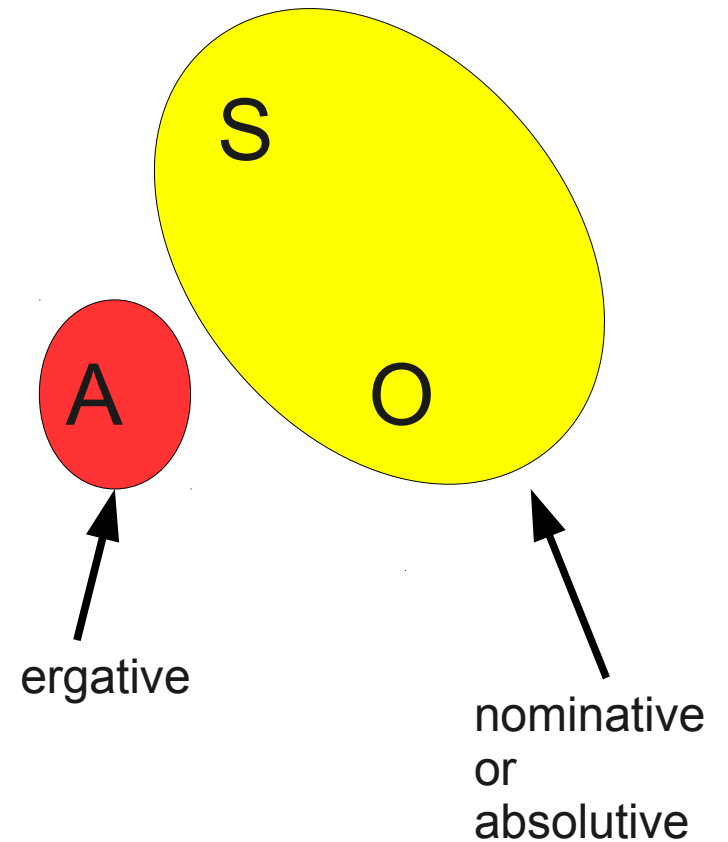

Kuntu wampa-ngku kaun muu-yan-puni-mi.
not girl-ERG dress.ABS dirty-PROP-CAUS-FUT
'The girl will not dirty the dress.'

Alignment systems

Accusative system

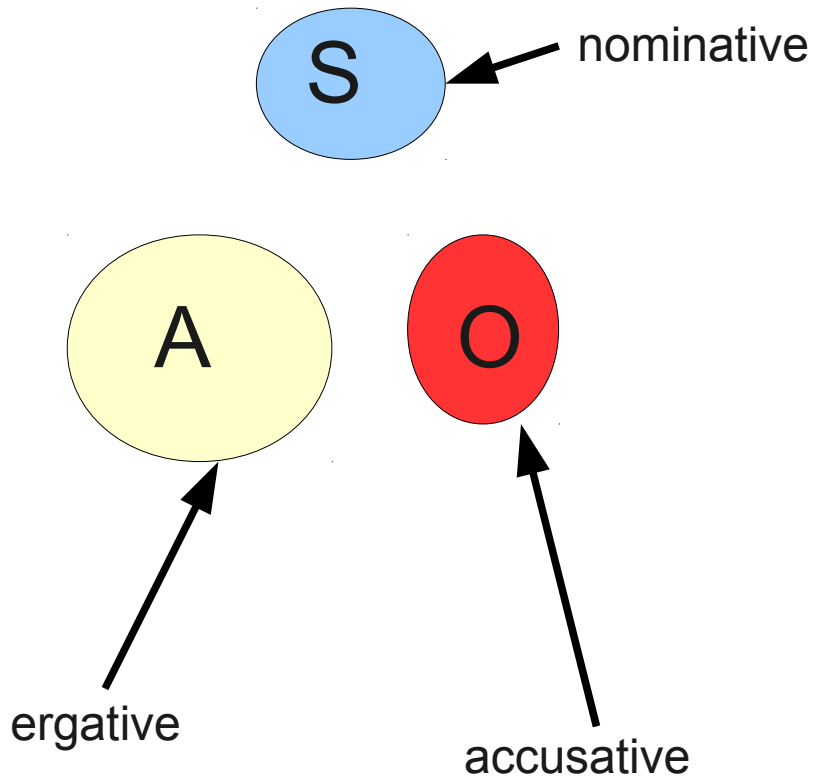

Ergative system

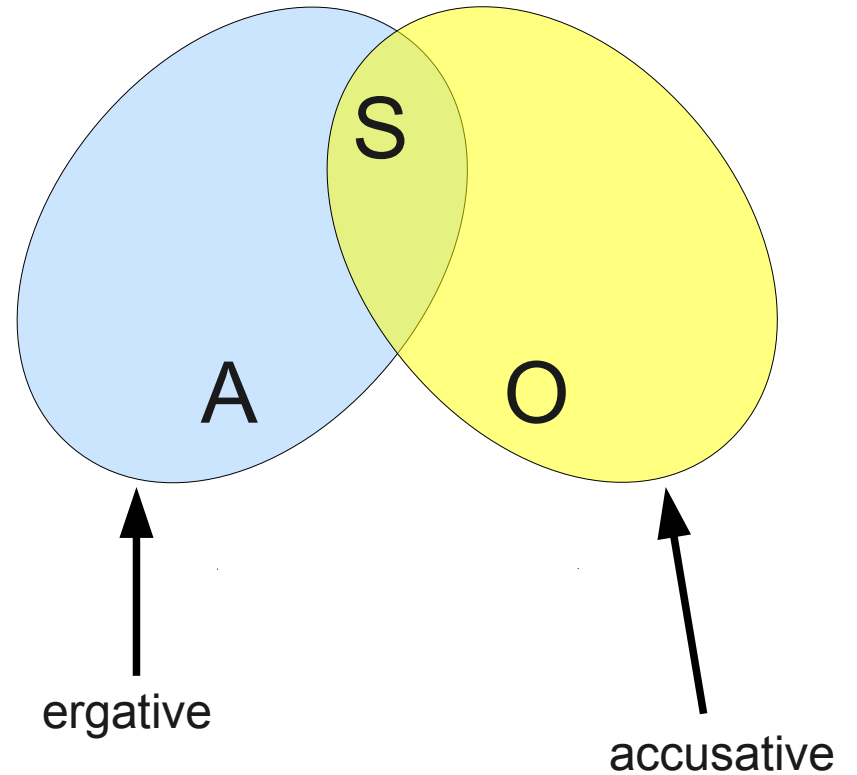

Alignment systems

Tripartite system

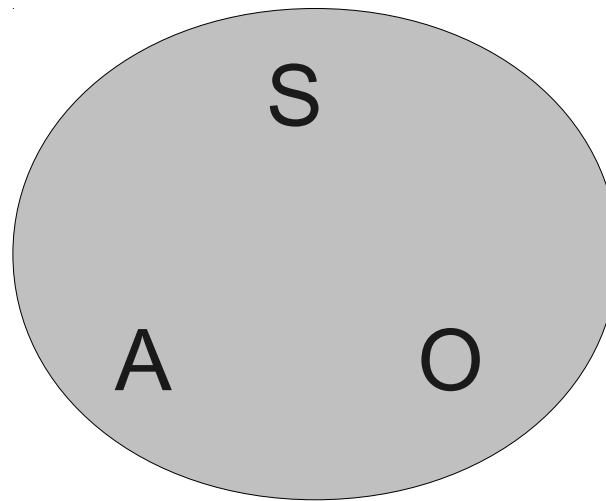

Active system (split intransitivity)

Alignment systems

Neutral system

Accusative systems

- **German**

Der Förster fällte **den Baum**.

the.NOM woodman cut-down the.ACC tree

'The woodman cut the tree down.'

Der Förster sägt

the.NOM woodman saws 'The woodman saws.'

Der Baum fällt.

the.NOM tree falls. 'The tree falls.'

Accusative systems

- **Latin**

Puer puellam vidit.

boy.NOM girl.ACC saw 'The boy saw the girl.'

Puer venit.

boy.NOM came 'The boy came.'

Puer cecedit.

boy.NOM fell 'The boy fell.'

Accusative systems

- **Quechua**

Juan aywa-**n**.

Juan go-3S 'Juan goes.'

Juan maqa-**ma**-**n**.

Juan hit-1S-3S 'Juan hit me.'

Juan **Petro-ta** maqa-**n**

Juan Petro-ACC hit-3S

Ergative systems

- **Dyirbal** (Australia)

ɲuma **yabu-ɲgu** bura-n

father mother.ERG see-NONFUT

'The mother saw the father.'

ɲuma banaga-nu

father returns-NONFUT

'The father returned'

Ergative systems

- **Avar** (Caucasian)

W-as w-ekér-ula

MSC-child MSC-run-PRES

'The boy runs.'

Inssu-cca j-as j-écc-ula

father-ERG FEM-child FEM-praise-PRES

'The father praises the girl.'

Tripartite systems

- **Wangkumara (Australia)**

Kana-ulu kalkana **titi-nana**.

man-ERG hit dog-ACC(FEM)

'The man hit the bitch.'

Kana-ia paluna.

man-NOM died

'The man died.'

Tripartite systems

- **Marathi** (ie., India)

Sudhā zhoplā

Sudha sleep.PAST.3SG

'Sudha slept.'

Madhu-ne Sudhā-lā parwā bādzārāt pāhila.

Madhu-ERG Sudha-ACC yesterday marketplace.LOC

see.PAST.3SG

'Madhu saw Sudha on the marketplace yesterday.'

Active systems

- in active systems, the S in intransitive clauses is marked with ergative or accusative, depending on its semantic role
- **Manipuri** (Tibeto-Burman, Northern India)

əy-nə mabu phuy.

I-ERG he beat 'I beat him.'

əy-nə celli

I-ERG ran 'I ran.'

əy sawwi

I became-furious 'I became furious.'

Active systems

- **Eastern Pomo** (Kokan: USA)

Yá:su:la wí ko:k^hóya.
rattlesnake.ERG 1S.ACC bit

'A rattlesnake bit me.'

Há: mí:pal sá:ka.
1s.ERG him.ACC killed

'I killed him.'

Wí qa:lálma.
1S.ACC sick

'I got sick.'

Há: xá:qákki.
1S.ERG bath

'I bathed.'

Active systems

- **Eastern Pomo (cont.)**

Wí će:xélka

1S.ACC slip 'I am slipping (accidentally).'

Há: će:xélka

1S.ERG slip 'I am sliding (deliberately).'

Neutral systems

- **Mandarin**

rén lái le.

person come CRS

'The person has come.'

zhāngsān mà lǐsì le ma.

Zhangsan scold Lisi CRS Q

'Did Zhangsan scold Lisi?'

Hierarchical systems

- **Mixe** (Penutian: Mexico)

Tə paat ha həyuhk t-wopy
PST Peter ART animal 3-hit 'Peter hit the animal'

Tə paat ha həʔy t-wopy
PST Peter ART person 3-hit 'Peter hit the man'

Tə mehç ha həʔy s-wopy
PST you ART person 2-hit 'You hit this person'

Tə əhc ha həʔy n-wopy
PST I ART person 1-hit 'I hit the person'

Tə əhc mehç n-coky
PST I you 1-want 'I wanted you'

Hierarchical systems

- **Mixe** (Penutian: Mexico)

Tə paat ha həyuhk w-[y]opy-ə
PST Peter ART animal 3-hit 'The animal hit Peter'

Tə paat ha həɔʔy w-[y]opy-ə
PST Peter ART person 3-hit 'The man hit Peter'

Tə mehç ha həɔʔy m-wopy
PST you ART person 2-hit 'The person hit you'

Tə əhc ha həɔʔy š-wopy
PST I ART person 1-hit 'The person hit me'

Tə əhc mehç š-coky
PST I you 1-want 'You want me'

Hierarchical systems

- In hierarchical systems, arguments are ranked according to a scale (usually based on animacy):

1st/2nd person > pronoun > proper noun >
human > animal > inanimate

- the higher ranking of {A, P} receives special treatment
- In Mixe:
 - agreement with highest ranking argument
 - special inverse marking on verb if $P > A$

Geographical distribution of marking systems

- case marking systems (full NPs)
- case marking systems (pronouns)
- agreement systems
- ergative systems are common:
 - Caucasian languages
 - Australic and Oceanic languages
 - Siberian languages
 - Maya languages, many South-American languages
 - not in Africa

Split systems

- many languages use hybrid systems
- geographical distribution

Split systems

- **English**

- accusative case marking system for
 - 1st person pronouns
 - non-neuter 3rd person pronouns
- neutral case marking system otherwise

I walked./I met John./John met **me**.

We walked./**We** met John./John met **us**.

He walked./**He** met John./John met **him**

She walked./**She** met John./John met **her**.

They walked./**They** met John./John met **them**.

It fell./**It** hit the surface./The stone smashed **it**.

Mary walked./**Mary** met John./John met **Mary**.

Split systems

- **German**
 - Accusative case system for
 - personal pronouns 1st and 2nd person
 - masculine singular
 - Neutral system otherwise

Split systems

- **German**

Ich sehe **mich**./ Ich lache.
Du siehst **dich**./ Du lachst.

Wir sehen uns./Wir lachen.
Ihr seht euch./Ihr lacht.

Er sieht **ihn**./ Er lacht.
Sie sieht **sie**./Sie lacht.
Es sieht **es**./ Es lacht.

Sie sehen **sie**./ Sie lachen.

Der Mann sieht **den Teller**. Der Mann lacht.
Die Frau sieht **die Schüssel**. Die Frau lacht.
Das Kind sieht **das Besteck**. Das Kind lacht.

Die Männer sehen die Teller. Die Männer lachen.

Split systems

- for a given sentence with a given meaning, only one case marking pattern is possible (in each language)
- in split systems, choice of system may be induced by
 - semantics of NP
 - tense/aspect/mood of verb

Split induced by semantics of NP

- **Turkish**

- accusative system for definite/specific objects
- neutral system otherwise

Ben kitab-**i** oku-du-m.

I book-**ACC** read-PAST-1SG

'I read the book'

Ben kitap oku-du-m.

I book read-PAST-1SG

'I was book-reading.'

Split induced by semantics of NP

- **Spanish**

Pedro besó **a** Lucía.

Pedro kissed to Lucia

'Pedro kissed Lucia.'

Pedro besó el retrato.

Pedro kissed the picture

'Pedro kissed the picture'

- animate objects are marked with preposition 'a', inanimate objects aren't
- in other words: neutral system for inanimates, accusative system for animates

Split induced by semantics of NP

- **Russian**

- accusative system for animate masc. and neut., neutral system otherwise

Misha uvidel dom/kot-**a**/brat-**a**

Misha saw house/cat-CM/brother-CM

Split induced by semantics of NP

Split between accusative system and neutral system is mostly called
Differential Object Marking (DOM).

Split induced by semantics of NP

- **Dyirbal** (Australia)
 - accusative system for 1st/2nd person pronouns
 - ergative system for 3rd person

Split induced by semantics of NP

- **Dyirbal**

ɲuma banaga-ɲu
father returned-PST 'Father returned.'

ɲura ɲana-na bura-n
2P 1P-ACC see-PAST 'You saw us.'

yabu ɲuma-ɲgu bura-n
mother father-ERG see-PST
'Father saw mother.'

ɲana ɲura-na bura-n
1P 2P-ACC see-PAST 'We saw you.'

ɲana banaga-ɲu
1P return-PST 'We returned.'

ɲura banaga-ɲu
2P return-PST 'You returned.'

Split induced by semantics of NP

- **Dyirbal**

- same sentence may contain accusative and ergative

yabu-ŋgu ŋurra-na bura-n

mother-ERG you-ACC see-NONFUT

'Mother saw you.'

Split induced by semantics of NP

- **Dyirbal**

Table 4.1. *Dyirbal*

A	-∅	- <i>ngu</i>	- <i>ngu</i>	- <i>ngu</i>
S	-∅	-∅	-∅	-∅
O	- <i>na</i>	-∅	-∅	-∅
	1st & 2nd person pronouns	3rd person pronouns	proper names	common nouns

(from Dixon 1994)

Split induced by semantics of NP

- **Cashinawa** (Panoan, Peru)

Table 4.2. *Cashinawa*

A	-∅	<i>habũ</i>	<i>nasalisation</i>
S	-∅	<i>habu</i>	-∅
O	<i>-a</i>	<i>haa</i>	-∅
	1st and 2nd person pronouns	3rd person pronoun	proper names and common nouns

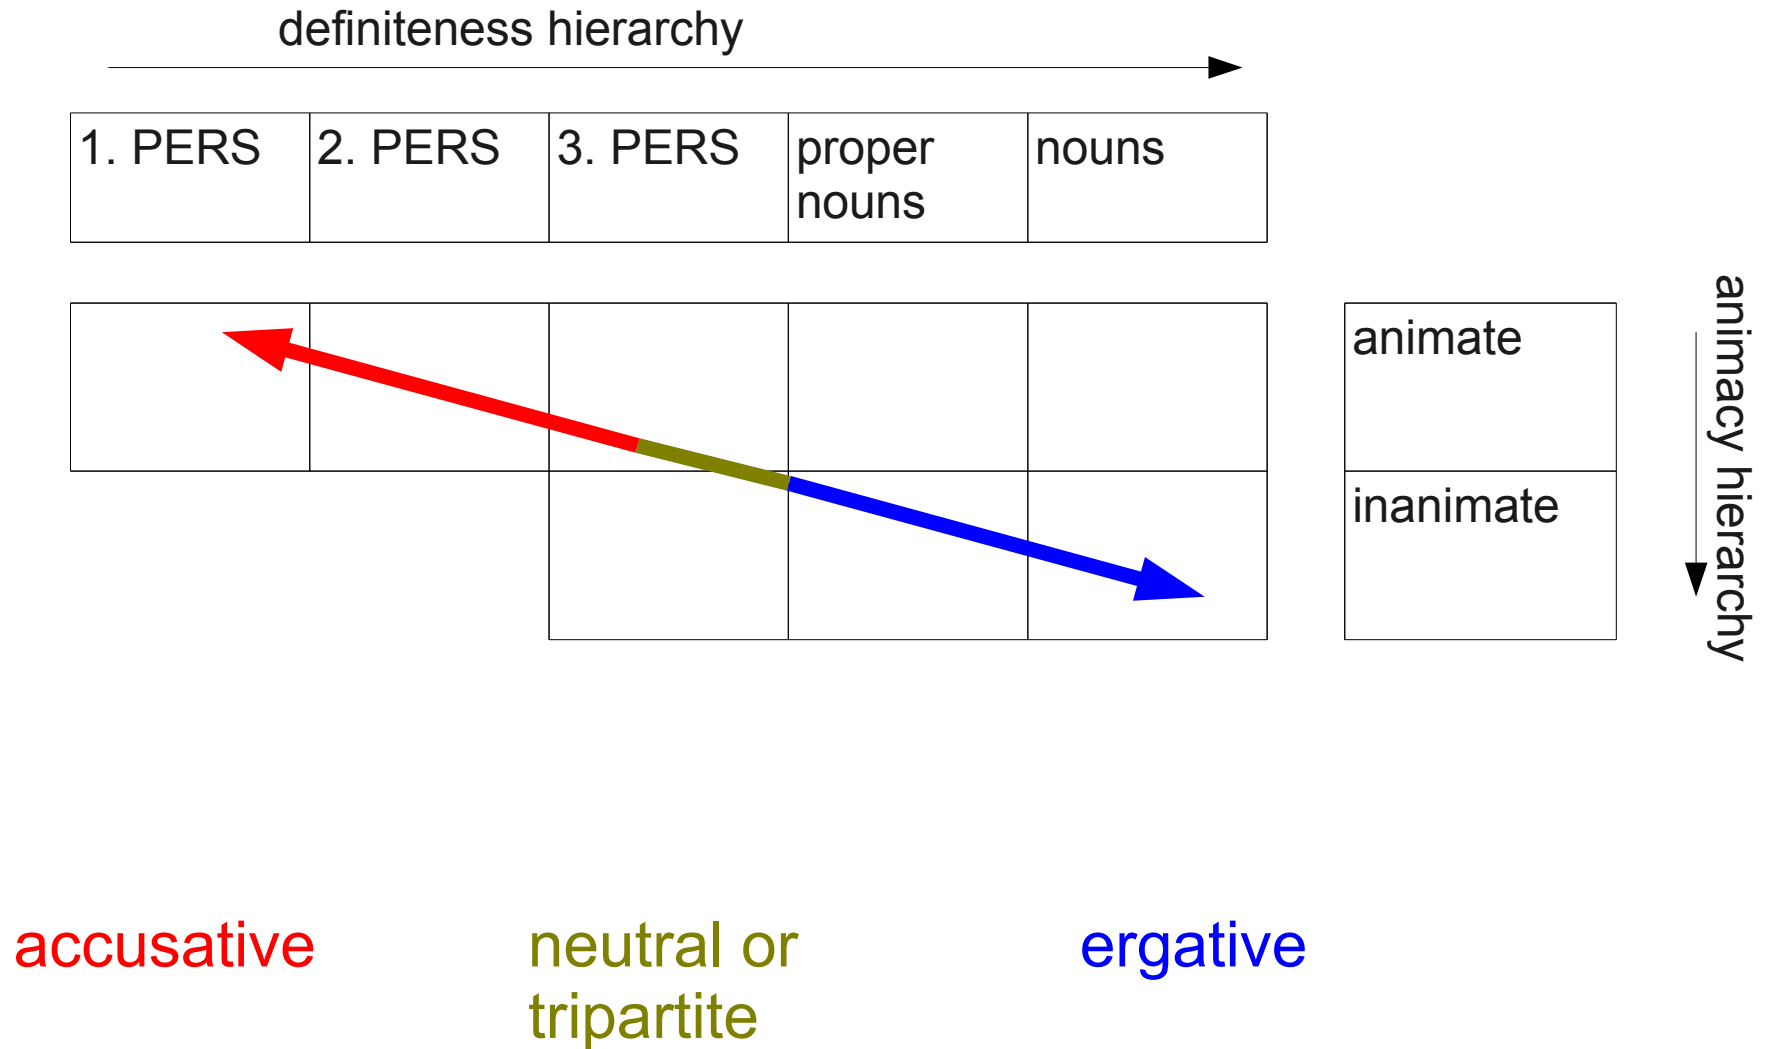

Split induced by semantics of NP

- **Yidin^y** (North Queensland)

Table 4.3. *Yidin^y*

A	∅	ERG	ERG	ERG	ERG
S	∅	∅	∅	∅	∅
O	ACC	ACC	(ACC)	∅	∅
	1st and 2nd person pronouns	human deictics, interrog.	inanimate deictics, proper names, kin terms	inanimate interrog.	common nouns and adjectives

General tendencies for NP based splits

Functional explanation

- NPs which are high on the scales are likely to be Agents
- NPs at the lower end of the scales are likely to be Objects
- languages tend to mark unusual configurations (like pronominal objects or 3rd person agents)
- next slide: results of corpus study (CHRISTINE corpus of spoken English)

Functional explanation

Split based on tense/aspect

- If a split is based on tense or aspect, the ergative pattern is always found either in the past tense or in the perfect aspect.

Split based on tense/aspect

- **Georgian**

- accusative system in present tense, ergative system in perfect

Split based on tense/aspekt

- **Georgian**

Student-i midis.

student-NOM goes.PRES 'The student goes.'

Student-i ceril-s cers.

student-NOM letter-ACC writes.PRES

'The student writes a letter.'

Student-i mivida.

student-NOM went.PERF 'The student went.'

Student-ma ceril-i dacera.

student-ERG letter-NOM wrote.PERF

'The student wrote the letter.'

Split based on tense/aspect

- Hindi
 - ergative system for perfective aspect, otherwise accusative system

लड़का	किताब	खरीदता	है
<i>laṛkā</i>	<i>kitāb</i>	<i>xarīdtā</i>	<i>hai</i>
boy- <small>Msg.NOM</small>	book- <small>Fsg.NOM</small>	buy- <small>IMPERFECTIVE-Msg</small>	be- <small>PRES.3Sg</small> ^[1]

"The boy buys a book."

लड़के-ने	किताब	खरीदी
<i>laṛke-ne</i>	<i>kitāb</i>	<i>xarīdī</i>
boy- <small>Msg-ERG</small>	book- <small>Fsg.NOM</small>	buy- <small>PERFECTIVE.Fsg</small> ^[1]

"The boy bought a book."
